

City Service Line Inventory

Potable Water Distribution System

October 16, 2024

Service Line Inventory Template

Date last updated: July 27, 2022

What is the purpose of this template?

The purpose of this draft template is to help water systems and states comply with the service line inventory requirements of the January 15, 2021 Lead and Copper Rule Revisions (LCRR). This template supplements the draft EPA document, **Guidance for Developing and Maintaining a Service Line Inventory** (2022) by providing fillable forms and tables that water systems can use to document their methods, organize their inventory, submit the initial inventory and inventory updates to the state, and document how they are making the inventory publicly available. This template also provides a checklist for state review. Note that EPA does **NOT** require systems use this template for their inventory. Refer to EPA's 2022 Inventory Guidance for minimum LCRR inventory requirements, recommendations, and disclaimers.

How is the template organized?

The **worksheets** in this template are color coded:

- Yellow sheets are instructions and background.
- Dark blue sheets are templates for systems.
- The dark green sheet is a template for states.

The **cells** in this template are also color coded:

- Gray cells are background or instructions.
- Light blue cells are fillable cells for systems.
- Aqua cells are the required fields in the **Detailed Inventory** worksheet.
- Light green cells are fillable cells for states.

See the table below for a description of each worksheet.

Template Organization		
Worksheet Type	Worksheet Name	Description
Background	Template Instructions_System	Contains detailed instructions for systems.
	Template Instructions_States	Contains detailed instructions for states.
	Classifying SLs	Summarizes requirements for classifying the entire service line when ownership is split (i.e. , when the system owns a portion and the customer owns a portion).
Templates for Water Systems	PWS Information	For systems to document basic system information.
	Inventory Methods	For systems to document the methods and resources they used to develop and update their inventory.
	Inventory Summary	For systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications. Systems can enter the totals into this worksheet or automatically generate totals based on information in the Detailed Inventory worksheet.
	Detailed Inventory	Provides a customizable format water systems can use to track materials for each service line in their distribution system. Each row equals one service line connecting the water main to the customer's plumbing. Separate columns track location information, the system-owned portion, the customer-owned portion, other possible sources of lead, information for assigning a tap sample tiering classification, and information for lead service line replacement (LSLR). Systems can customize the worksheet by adding or deleting columns.
	Public Accessibility Doc.	For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.
Templates for States	State Checklist	Provides a checklist that states can use to determine and document if water systems met all of the January 15, 2021 LCRR requirements for their Initial Inventory including timely submission, required elements, use of information sources, public accessibility, and public notification of service line materials.

Classifying the Entire Service Line When Ownership Is Split

Purpose of this worksheet : To summarize EPA's requirements for classifying the entire service line when ownership is split.

Introduction

In many cases, service line ownership is **split** meaning that the system owns a portion and the customer owns a portion of the service line. Exhibit 1 below is a diagram of a possible division in service line ownership between the water system and customer. While the LCRR requires the inventory to categorize each service line or portions of the service line where ownership is split, a single classification per service line is also needed to support various LCRR requirements, such as lead service line replacement (LSLR), tap sampling, and risk mitigation. Table 1 below indicates how to classify the material for the entire service line when ownership is split between the water system and customer. For more information, see EPA's, **Guidance for Developing and Maintaining a Service Line Inventory** (2022).

Exhibit 1. Example of Service Line Ownership Distinction between the Water System and Customer

Source: Exhibit 2-2 of *Guidance for Developing and Maintaining a Lead Service Line Inventory* (USEPA, 2022).

Table 1: Classification of Entire Service Line When Ownership is Split

System-Owned Portion	Customer-Owned Portion	Classification for Entire Service Line
Lead	Lead	Lead
Lead	Galvanized Requiring Replacement	Lead
Lead	Non-lead	Lead
Lead	Lead Status Unknown	Lead
Non-lead	Lead	Lead
Non-lead and never previously lead	Non-lead, specifically galvanized pipe material	Non-lead
Non-lead	Non-lead, material other than galvanized	Non-lead
Non-lead	Lead Status Unknown	Lead Status Unknown
Non-lead, but system is unable to demonstrate it was not previously Lead	Galvanized Requiring Replacement	Galvanized Requiring Replacement
Lead Status Unknown	Lead	Lead
Lead Status Unknown	Galvanized Requiring Replacement	Galvanized Requiring Replacement
Lead Status Unknown	Non-lead	Lead Status Unknown
Lead Status Unknown	Lead Status Unknown	Lead Status Unknown

Source: Exhibit 2-3 of *Guidance for Developing and Maintaining a Service Line Inventory* (USEPA, 2022).

PWS Information

Purpose of this worksheet: For water systems to document basic system information.

Facility Information

Water System Name:

City of Quincy Water Department

PWSID:	Population Served (number of people):	Number of Service Connections:	PWS Type:
70450 1	8,415	2763	☒ CWS ☐ NTNCWS

If you are a CWS, do multi-family residences comprise at least 20% of the structures you serve? **No**

Mailing Address

Street or P.O. Box:

PO Box 338 / 104 B Street SW

City or Town:	State:	Zip Code:
Quincy	Washington	98848

System Contact Person

Name:	Title:
Bob Davis	Q1W Water Program Manager
Telephone:	Email:
509-787-3523	bdavis@quincywashington.us

Person Who Prepared Inventory (if different from above)

Inventory Methodology

PWS Name: City of Quincy Water Department

PWSID: 70450 1

Enter Date Last Updated: 10/16/24

Purpose of this worksheet: For water systems to document the methods and resources they used to develop and update their inventory.

Part 1: Historical Records Review

Type of Record	Describe the Records Reviewed for Your Inventory and Indicate Your Level of Confidence (e.g. , Low, Medium, or High)
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	No known Tier 1 lead sampling has been required on water distribution system in Quincy, Washington. Since no previous materials evaluations have been done, the level of confidence is low.
2. Construction Records and Plumbing Codes <i>Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.</i>	Known and available construction records were reviewed to help determine the water piping materials for the City of Quincy system owned piping and the Customer Owned system piping materials. Since records are available for both City owned and Customer owned system piping, the Level of Confidence is High.
3. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	Previous City of Quincy water system plans were reviewed to help assess the materials of construction for city owned system piping. General level of confidence for the evaluation of materials of construction for the city owned system piping is Medium since some piping is unknown.
4. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	Some inspections were performed where both City owned systems and customer owned systems were visible from the existing water meter or curb stop. However, since some of the underground system piping is unknown, the Level of Confidence is Medium.
5. Additional Records Required by Your State	None
6. Other Records	None

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

- | | |
|--|--|
| ☐ Water meter reading | ☒ Water main repair or replacement |
| ☒ Water meter repair or replacement | ☐ Backflow prevention device inspection |
| ☒ Service line repair or replacement | ☐ Other |

If "Other", please explain:

2. Did you develop or revise standard operating procedures to collect service line material information during normal operation? **No**
If "Yes", please describe:

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. **Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.**

- | | |
|--|---|
| ☒ Visual Inspection at the Meter Pit | ☐ Water Quality Sampling - Other |
| ☐ Customer Self-Identification | ☐ Mechanical Excavation |
| ☐ CCTV Inspection at Curb Box - External | ☐ Vacuum Excavation |
| ☐ CCTV Inspection at Curb Box - Internal | ☐ Predictive Modeling |
| ☐ Water Quality Sampling - Targeted | ☐ Other |
| ☐ Water Quality Sampling - Flushed | |

☐ Water Quality sampling - Sequential

If "Other", please explain:

2. If "Predictive Modeling", please briefly describe the model and inputs used:

Predictive modeling for this water system is where some data of surrounding service connections were available but several other connections had no data. Predictive modeling was then selected in the inventory table where a connection was assumed to be similar to the other service connections in the area.

3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?

No locations were prioritized since general water quality sampling for lead and copper have shown concentrations below the action levels.

Inventory Summary

PWS Name: City of Quincy Water Department

PWSID: 70450 1

Enter Date Last Updated: **10/16/24**

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information

1. Is this the Initial Inventory or an Inventory Update ?	Initial Inventory
2a. Who owns the service lines in your system? <i>If other, please explain below.</i>	Ownership is split, meaning that the system owns and portion and the customer owns a portion
2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? <i>If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).</i>	Yes
Ownership is split at the water meter and curb stop which is generally at or near the property line of the water customer. Property owners/water customers are responsible for the piping from the water meter/curb stop into the customer's service points.	
3a. Describe when lead service lines were generally installed in your system.	
No known lead service line installations dates were found.	
3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.	
1986 Clean Water Act Amendments	
4. Do you have lead goosenecks, pigtails or connectors in your system?	No
5. What is your overall level of confidence in the inventory (i.e. , "Low", "Medium", or "High.") Please explain your rationale below.	
Based on the City's review of the data, the overall level of confidence would be Medium since there is a small number of service connections that are unknown.	

Part 2. Inventory Format

Describe your inventory format in the space provided below (e.g. , the **Detailed Inventory** worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable. **Note that the state may require you to submit your detailed inventory of each service line in your distribution system.**

EPA provided Detailed Inventory Worksheets.

Part 3. Inventory Summary Table ¹

If you are using the **Detailed Inventory** worksheet, the classifications you select in the Column "Entire Service Line Material Classification" (Column X) will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines in the aqua-colored cells. **Remember this is the classification for the entire service line.**

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	67
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	2,559
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	116
TOTAL		2,632

Notes

¹ This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.

Detailed Inventory		
PWS Name: City of Quincy Water Department		
PWSID: 70450.1		
Date Last Updated: 10/16/2024		

Location Information				System-Owned Portion									Customer-Owned Portion							Entire Service Line Material Classification	Other Potential Sources of Lead			Additional Information to Assign Tap Monitoring Tiering				Lead Service Line Replacement (LSLR)		
Unique Service Line ID	Location Identifier		Sensitive Population? (Yes/No)	Disadvantaged Neighborhood? (Yes/No)	System-Owned Portion Service Line Material Classification	If Non-Lead in Column G, Was Material Ever Previously Lead?	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	If "Yes" Service Line Material Was Field Verified:		Notes	Customer-Owned Portion Service Line Material Classification	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	If "Yes" Service Line Material Was Field Verified:		Notes	Is there a Lead Connector?	Is there Lead Solder in the Service Line?	Describe Other Fittings and Equipment Connected to the Service Line that Contain Lead	Building Type Connected to Service Line	Point-of-Entry or Point-of-Use Treatment Present?	Does the Interior Building Plumbing Contain Copper Pipes with Lead Solder Installed Before Your State's Lead Ban (Generally 1985 - 1988)?	Current LCR Sampling Site?	Date of System-owned LSLR	Date of Customer-owned LSLR
A Unique ID is recommended for each service line.	Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.		Select Yes if sensitive subpopulation, e.g., day care, school, multifamily home. If Yes/Other, describe in the Notes field.	Does location meet state affordability guidelines or other measures?	Dropdown list includes recommended subclassifications. If "Non-Lead Other", describe in Notes field	Select Yes, No, or Don't know. Important for determining if downstream customer-owned galvanized service line requires replacement	Date, year, or estimated date range when the service line was installed or replaced	Diameter in inches	Select option from dropdown list. If "Other," describe in the Notes field	Select Yes or No	Select option from dropdown list. If "Other," describe in the Notes field	Enter approximate date of field verification or date that the record was updated	Can use this field for documenting additional relevant information, including when classification changes.	Dropdown list includes recommended subclassifications. If non-lead other, describe in Notes field.	Date, year, or estimated date range when the service line was installed or replaced	Diameter in inches	Select option from dropdown list. If "Other," describe in the Notes field	Select Yes or No	Select option from dropdown list. If "Other," describe in the Notes field	Enter approximate date of field verification or date that record was updated	Can use this field for documenting additional relevant information, including when classification changes.	Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown	For example, lead gooseneck or pigtail where the water main is connected to the service line	Select Yes, No, or Don't Know	For example, backflow preventer or meter containing lead	Note: This information may be helpful for identifying lead tap monitoring locations.

Public Accessibility Documentation

PWS Name: City of Quincy Water Department

PWSID: 70450 1

Enter Date Last Updated:

10/16/24

Purpose of this worksheet: For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.

1. Select the location identifiers that you use for your service line inventory. Check all that apply.

- ☒ Address
- ☒ Street
- ☒ Block
- ☒ Intersection
- ☐ Landmark
- ☐ GPS Coordinates
- ☐ Other

If "Other", please describe:

2. Does **every service line** have a location identifier?

Yes

If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.

3. How are you making your inventory publicly accessible? Check all that apply. Remember that if your system serves > 50,000 people, you **must** provide the inventory online.

- ☐ Interactive online map
- ☐ Static online map
- ☒ Online spreadsheet
- ☐ Printed service line map
- ☒ Printed tabular data
- ☐ Information on water utility mailings or newsletter
- ☒ Hard copy information available in water system office
- ☐ Other

If "Other", please describe:
